I was recently ordered into an open boat belonging to the Henriet-. tender to the cruizing round the Island, to prevent the traffic in slaves with Madagascar. The boat was commanded by the master, Mr. Gordon, and we had been three weeks in her, when, on the 28th of October, an unfortunate end was put to our cruize,-The Henrietta heaving in sight Mr. Gordon wished to see the officer commanding her, when it coming to blow hard, and quite dark, our boat shipped a sea, and down she went. I could swim a little, and with great afficulty reached the reef. I immediately went to the barracks and sin off a boatto save, if possible, my unfortunate companion but the night being dark, nothing could be seen of them. Next morning I went off myself, and rowed about to see if I could get the bodies of our master and the men; when a a little distance I perceived a number of large shark with something they had got; on nearing them, I perceived they were eating poor Mr. Oprdon; I fired at the one who had him which let go the one who had him which let go his hold, and I assisted one of the men in getting the remains into the boat, when an immense large sharke came from under the boa and seiz-ed the remains from us. From the Charleston Courier of June 14. FROM EAST. FLORIDA .- Captain Chester, of the aloop Wasp, arrived yesterday from St. Augustine, informs that the U.S. schr. Nonsuch, Lt. Comdt. Turner, arrived off that port on Thursday last, in five days from Havana, having on board Mr. AREBONDO, the Commissioner appointed by the Captain-General of Cubay toude per the province of East-Florida into the hands of the American authorities—which event it was supposed would take place on the 15th inst. the American troops being expected to arrive from Fernandina by that time, as information of the arrival of the Commissioner, had been dispatched to that post. It was understood that the Spanish Commissioner brought with him \$10 000 to meet the demands against the Spanish government in East-Florida, but it was supposed that sum would be by no means adequate to the purpose.

The Nonsuch remained off the port un'il Saturday last, when, after, saluting the town, (which was promptly returned) she proceeded for New York.

On Saturday morning the Governor of St. Augustine issued a Proclamation, informing the inhabitants of the event which was about to take place, and exhorting them to be peaceable and friendly towards the new order of things.

Savannah, June 11. We have received, through the politeness of a gentleman at Saint Augustine, the following letter. To those who are anxiously waiting for the consummation of the transfer of the Florida possessions, the contents will prove interesting; being the most recent intelligence received from that quarter:

Extract of a letter to the Editor of the Republican, dated St. Mary's, June 10.

"The United States schr. Nonsuch was off Augustine on the 7th inst. and landed the Spanish Commissioner with orders to the go vernment to deliver up the place to the United States. The ship Meteor, with United States' troops on board, will sail furthere the first wind that she can get out, for Augustine, convoyed by the United States' schs. Porpoise and Tartar. The Tartar being of an easy draft of water, will disembark the troops."

To the Editors of the Georgian. "St. Augustine. (E. F.) June 6. On Tuesday, arrived off this harbour the United States' sch. Porpoise, from which a communication was received by the Governor, an nouncing its readiness to convey the Spanish officers and soldiers to Havana; in the evening, the sch. weighed anchor, and stood out to

Latest from St. Domingo. We have perused a file of Hay tien papers down to the 3d instant. They contain ng news. A detail of great minuteness is given of the progress of Bover in the lately disturbed parts of the island. Tranquility is every where established. The State vs. Lorenzo Dow. The defendant came into court to receive the sentence of the law; in the case of a libel (of which he had been convicted this term) against the late Rev. Mr. Hammett. PPrevious to the charge, or sentence of the judge, Mr. Dow read, (by per-mission of the court,) a very interesting document, explanatory of his motives, and justificatory of the objects he had in view, by the publication of the book, from which the libellous matter was extracted. The sentence of Mr. Dow, was very mild, being only an imprisonment of 24 hours, and a fine of one dollar with the costs. We are informed that the officers of the court have given up the costs and that the governor has remitted the imprison-

A CURIOSITY.

Among the additions just made to Dr. Mitchell's collection, is a letter from the Chippewa a tribe of Indians to the Sioux, with the answer of the Sioux to the Chippewas, done during the summer of 1820. Both are executed with the point of a knife, or some other hard body, upon the bark of the birch tree. They are examples of picture writing, bordering upon the symbolic or hyeroglyphic, and show the manner in which the aborigines of North America communicate their ideas at the present day.

The (N. Y.) Ballstown Farmer of June 6th. says-"I noticed the week before last, the arrival of Commodore Barron and the feeble state of his health. It is doubtful, if he is getting any better of his complaint."

POLICE OF PARIS.

A curious fact which occurred during the reign of Buonaparte, illustrating the state of perfection to which the system of espionage was carried at that time.

A party sat down to dinner at a public dinner table, when a gentleman sticking his fork into a fowl. began to dissect it, and as he cut off the head, he said with a laugh, "Here goes the head of the Empe-No observation was made, and they proceeded with their dinner; but in the course of it the waiter came, and tapping the gentleman on the shoulder, told him he was wanted in the hall. On enter. ing the hall, he was accosted by a not the gentleman, who at dinner, said, 'Here goes the head of the Emperor?" He replied he was, "but what of that?" "You must come," said the gentieman, "with me; "with you," he exclaimed, and putting his hand in his pocket presented it full of money to the officer, and was turning away-"Stay" said the officer, "I am not to be thus dealt with -you must instantly obey my summons"-"alas," said the gentleman, "am I then to be torn from my wife and children, and hurried to a dungeon for such a trifle as that; my life and my liberation are most pre-cious and important to my family— I will give you and he named an enormous sum, to liberate me, and for ever conceal the affair." "No," said the inflexible gendarme, "I am above the largest bribe you can of fer, and you must instantly go, for I dare not parley with you any longer." The gentleman then took a card from his pocket, which he held up to the view of the gendarme, who immediately madehia obeisance to him and departed. Now the fact is, the gentleman himself was a superintendant of these spies. The waiter in the tavern was in

the pay of the government; he made the observation respecting the head of the Emperor in the hearing of the waiter to prove his vigilance, he was true to his charge, and directly apprised one of the gendarines of the seditions a treasonable

fers, and finding him faithful, his carried about him; and which bore the secret sign; who he was, there the matter ended, to the satisfaction of all the parties concerned.

From a London Paper, April 25. MERMAID.

It was mentioned in all the Journals, some time ago, that a Mermaid, caught in the Indian seas, had been brought to this country. The creature so described, and no doubt one of the species which has given rise. to so many fabrious stories, is now in the Museum Surgeon's Hall, London. It is about 8 feet in length, and bears a strong resemblance to the common seal. There is also a young female of the same species in the same place. They belong to the class of Mammalia; the fins terminate, internally, in a structure like the human hand; the breasts of the female are very prominent, and in suckling its young not only their appearance, but their situation on the body must, cause that extraordinary phenomenon which leads to the popular belief. In other respects the face is far from Tooking like the human race; and the long hair is as entirely wanting as the glass and comb.

A Valuable Tract of Land

For Sale,

Four hundred acres of land is offered for sale adjoining to Friendship in Anne Arundel county, the greater part of this tract is covered with wood of various kinds: such as Locust, Oak, Hickory, Poplar, Cedar, and a large quantity of very fine Chesnut. The se is very fine, adapted to Plaster and Clover, and equal to any in that part of the country for the cultivation of Tobacco, Corn and small Grain. This land is about a mile from from Chew's Cove, on Herring Bay, which gives it many advantages. A packet runs regularly once a week to Baltimore, from the Cove, which affords great facility in sending the produce of the soil to the Baltimore Market, Friendship and the neighbouring country being bare of wood, principally depend for their supply from this tract of land.— It would be divided into smaller parcels to suit purchasers, and the terms liberal. The improvements now erected on this land will cure 20 hogsheads of tobacco with the necessary out houses for Overseer and Servants -This land abounds with fine springs of water, and in a good neighbourhood. For further particulars, apply to NI-CHOLAS BREWER, Esq. of Annapolis, or of William T. GRAHAM, at Chew's Cove, Herring Bay. June 28.
